

Effortless Data Analysis with FinScan

Empowering Insights, Infinite
Possibilities

KNOW MORE →

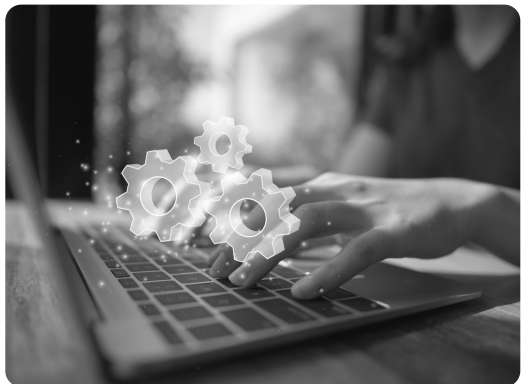

Efficiency Challenges in Data Management

In the daily grind of work, users slog through stacks of docs, extract details, and input them into systems.

Innovate with FinScan

A cutting-edge solution that seamlessly integrates Power Apps, Open AI, and GPT Vision 4 technologies to transform the way you handle data-related tasks.

Features

Role-Based Project Creation

Create projects tailored to the specific requirements

AI-Powered Data Analysis

Leverage the combined power of Open AI and GPT Vision 4 to analyze data effortlessly

Image Analysis and Description

Upload images and let FinScan describe or analyze them intelligently

Email Response Automation

Respond to emails with ease using FinScan's AI-driven email response generation feature

Personal Identification Information Extraction

Extract personal information from documents seamlessly

Data Sharing with Email Integration

Seamlessly share FinScan populated data with just a click using the integrated Email feature.
